## DANIEL WOODHEAD 1750 RECEPTACLE WIRING TESTER

### APPLICATION

Compact tester has three neon indicating lights, which provide a convenient way to test 3 wire, 115VAC, single phase, polarized outlets. Checks for correct wiring, reversed-polarity open-ground open-neutral, open hot, hot and ground reversed and hot on neutral/hot unwired.

### SPECIFICATIONS

- Housed in insulated impact-resistant plastic.
- Plug is configured as a three blade 15A plug.
- Three neon indicators.
- U.L. listed.

### COMPLIANCE

NFPA 99-1990, Ref. 3-5.2.2.1(d).

### ACCESSORIES

Carrying case included.

## DANIEL WOODHEAD 1760 RECEPTACLE TENSION TESTER

### APPLICATION

Use to test tension of general purpose receptacles with the following ratings: 15A, 125V, 2-pole, 2-wire; 15A, 125V, 2-pole, 3-wire; 20A, 125V, 2-pole, 3-wire. Can be used on energized receptacles.

Insert stainless steel blades into receptacle to determine tension and safety.

### SPECIFICATIONS

- Housed in insulated impact-resistant plastic.
- Each blade has an independent spring to relieve stress and provide consistent readings.
- Reads from 4 to 24 ounces of tension.

### COMPLIANCE

NFPA 99-1990, Ref. 3-5.2.2.1(d).

### ACCESSORIES

Carrying case with pocket clip included.
