Shutdown/Turnaround Industrial Project Services

Planning

Planning Impact

- Field level risk assessments and site preparation
- Safety awareness and training
- Establish KPI's (availability, pricing, equipment specifications)
- Pre-shutdown checklist
- Budget goals and preliminary quotation

Equipment Evaluation and Planning

- Historical information to determine lists and equipment/tool reduction opportunities
- Operational Training
- Distribution of work team packages
- Evaluate potential emergent work issues

Implementation

Direct Impact

- Daily forecasting to scheduled budget
- Daily management updates on inventory and access
- Suspended or off-rent practices to reduce overall budget

Equipment Evaluation and Planning

- Tracking historical information to determine potential reduction opportunities
- Mechanical servicing and fueling
- Customer equipment management programs
- Identify tools/equipment for emergent work
